Filed : **February 27, 2004**

INTERVIEW SUMMARY

Applicant thanks the Examiner for the courteous interview conducted on November 15, 2006, and the helpful comments provided therein. In the Interview, the Examiner agreed that Toppo teaches administration of capsaicin, which affects the function of peptides, and that, therefore, one of ordinary skill would not administer peptides such as calcitonin in the delivery system of Toppo as claimed by Applicant.
